Subject Index

Activation energy, 107
Alcohols, 163
Artificial kidney, 217

Benzene–cyclohexane mixture, 273

Cake formation, 77
Cd^{2+} and Pb^{2+} extraction, 49
Ceramic membranes, 57
CH_4, 163
Characterization, 127
Chromatography, 217
Cleaning, 149
CO_2, 163
Coalescence, 197
Colloids, 229
Composite membranes, 89, 175, 185, 273
Concentrated emulsion polymerization, 273
Concentration polarization, 39, 149, 207
Coupled, 49

Dialysis, 217
Diffusion, 39, 175
Diffusion of binary mixtures, 107

Electrochemistry, 39
Electroconvection, 249
Electrolyte transport, 285
Enantioselective permeation, 117

Facilitated transport, 49, 259
Fibre membranes, 207
Flow profiles, 207
Flux control, 229
Fouling, 149, 207

Gas and vapor permeation, 249, 259
Gas permeability, 29
Gas separations, 57, 89

Hollow fiber module, 197
Hybrid processes, 259

Inorganic membranes, 89

Ion-exchange membranes, 185

Liposomes, 49
Liquid membrane, 249
Liquid permeability and separations, 127

Mass transfer, 1
Mathematical model, 241
Membrane characterization, 217
Membrane electrodes, 39
Membrane evaluation, 149
Membrane preparation and structure, 89, 127, 217
Metal membranes, 89
Metal-sorbing vesicles, 49
Microfiltration, 77
Microporous, 57
Microporous and porous membranes, 127
Microporous membranes, 197, 285
Modeling, 77, 163
Multiple steady state, 39

Nano-sized catalyst, 29
NMR micro-imaging, 207
Numerical simulation, 107

Oil/water separation, 197
Organic Separations, 259
Oscillations and excitable membranes, 39

Permeation, 163
Pervaporation, 273
PFSI, 163
pH effect, 285
Plasma treatment, 139
Polarisation, 21
Polarised layer, 229
Polar solvents, 249
Polyacrylonitrile, 107
Poly(amide imide), 29
Poly(dimethylsiloxane), 139
Polydispersity, 77
Polyelectrolytes, 21
Polyethylene glycols, 1
Poly{γ-[3-(pentamethyldisiloxanyl)propyl]-L-glutamate}, 117

1995 Elsevier Science B.V.
SSDI 0376-7388

Polyperfluorosulfonate ionomer, 163
Pore size, 127
Porous support, 175
Protein deposition, 149
Pure fluid flow, 241

Rotary filtration module, 241

Selective permeation of CO_2, 139
Separation of CO_2 over CH_4, 139
Skin, 175
Sol-gel process, 57
Space-charge model, 285
Specific resistance, 77
Sulfonated polystyrenes, 185
Surface modification, 139

Theory, 21, 259
Three-dimensional analysis, 175

Ultrafiltration, 1, 21, 149

Water sorption and diffusion, 185
Water transport, 185
Water treatment, 49
Weak acid groups, 285
Wetting, 197

Zeta potential, 229
